

Auxiliary Power Pack

ROV Supply Pressure:	180 bar required
ROV Supply Flow Rate:	40 Lpm required
Max. ROV Pilot Pressure:	207 bar
Max. Pump Pressure:	300 bar (Currently set at 250 bar)
Max. Pump Flow Rate:	48 litres per minute (Currently set at 20 Lpm)
Hydraulic Pump Type:	Rexroth, A10VSO28DFR31, Variable Displacement Pressure Compensated, 28cc/rev
Hydraulic Motor Type:	Rexroth, A2FM23/61WPPB04, 23cc/rev fixed displacement
Filtration:	6 micron Pressure Filtration 10 micron Return Line Filtration
Reservoir:	32 Litre compensated hydraulic oil reservoir, Pressure Compensator & 20 Litre Bladder Allows for 15 Litres of Oil Displacement Fitted with over pressure & vacuum pressure Safety Valves
Frame:	Tubular Reservoir c/w mounting feet Pumps & valves mounted onto reservoir
Overall Dimensions:	700 mm L x 700 mm W x 400 mm H
Weight:	80 kg

A full certification package is supplied for the unit, in accordance with all the current legislative standards.
